Tip of the Month By Tom S. Truesdale

Kitchen Renovations - Part 2

Last month, I described a wide range of ideas regarding renovations and updates to the kitchen and how investment in these projects will pay back immediately with the value and resale appeal of your home. This month, I would like to discuss some of the planning strategies and logistics involved with completing kitchen updates and renovations.

Below, I have listed some details that if addressed prior to start of construction will help your project be a success...

- **Planning / Design:**

Invest time and thought into both layout and scope development prior to beginning your project. Consult with an experienced Planning and Construction Professional to provide guidance and advice.

- **Think about logistics and interruption:**

The kitchen is obviously one of the most used rooms in the home, even a small update or renovation will cause interruption that needs to be understood prior to the start of the project.

- **Define and detail your budget hand in hand with scope development:**

Consult with an experienced Planning and Construction Professional to provide guidance and advice.

- **SAMPLES, SAMPLES, SAMPLES:**

There is a very wide variety of products, materials, colors and levels of quality to review before purchase of materials. For example... Type of countertops • Type of cabinets • Lighting fixtures • Sinks / faucets • Flooring products • Wall coverings and protection • Appliances, location, type and function.

The Kitchen can potentially be an extremely complicated room to renovate, a good deal of thought and planning needs to take place before beginning your project, hopefully the points I have provided give you a good foundation of where to start. Of course never hesitate to contact a local, qualified Construction Professional to provide development and delivery services for your Kitchen Renovation project.
